

## 13 & 14 March

### Aerosol Technology

Stratford Hotel, Stratford Upon Avon

This intensive 2 day course is designed to provide a good understanding of how an aerosol works, how it is made, what affects the performance of an aerosol product as well as the environmental and regulatory considerations that need to be taken into account.

#### Who should attend?

The course is designed for anyone new to the industry or wishing to update their knowledge of the aerosol. It is targeted at supervisor level/laboratory staff and above. The course is also well suited to those experienced in one area of the industry but wishing to enhance their knowledge of other areas.

**Price:** *Members rate* £585 pp + VAT  
*Non Members rate* £720 pp + VAT

## 24 April **NEW for 2012!**

### Warehousing Seminar

New Hall Hotel, Birmingham

This one day seminar will provide expert guidance on how to assess and minimise the risks of storing filled aerosols and what is required in order to comply with legislation including COMAH and DSEAR.

#### Who should attend?

The seminar is designed for anyone involved in storing filled aerosols throughout the supply chain, including third party warehousing and retail regional distribution centres.

**Price:** *Members rate* £175 pp + VAT  
*Non Members rate:* £375 pp + VAT

## 22 May

### Classification & Labelling Course

National Space Centre, Leicester

This one day course for members only is based on the Classification and Labelling module in the BAMA Standard, Issue 4. It will train regulatory specialists in how to deal with the classification, safety assessments, notification and labelling requirements of the Aerosol Dispensers Directive, REACH and CLP as well as provide information on weights and measures, voluntary warnings and the valuable opportunity to ask all those questions about what labels are required on an aerosol can and what information is needed to support them.

#### Who should attend?

Anyone responsible for classification and labelling of aerosols or for advising customers

**Price:** *Members rate* £275pp + VAT

## 24 May

### Transport Seminar

BAMA Offices, London

Aerosols are classed as dangerous goods for transport and the transport regulations require that any shipment of aerosol goods, including samples, must be properly declared and adequately packaged. This course fulfils the UN training requirement for those involved in the transport of dangerous goods.

#### Who should attend?

This one day course is designed for any employee involved in the consigning of aerosols for transport by road, rail, air or sea. A certificate is issued to those who attend.

**Price:** *Members rate* £200 pp + VAT  
*Non Members rate:* £370 pp + VAT

## 14 June

### Environment Day

BAMA Offices, London

The BAMA Environment day is a new approach to issues management for the Association. Key to this approach is an Environmental Issues Seminar covering the three current 'hot' topics affecting the aerosol industry followed by a meeting of the Committee to agree the BAMA strategy for the next twelve months on these and other Environmental Issues.

#### Who should attend?

The Seminar and Committee meeting are open to all BAMA members so please come along and join the debate

**Price:** *Members rate* FREE

## 21 June **NEW for 2012!**

### Classification & Labelling for Retailers

Imperial War Museum, London

This one day course will train retailers in how to deal with the classification, safety assessments, notification and labelling requirements of the Aerosol Dispensers Directive, REACH and CLP as well as provide information on weights and measures, voluntary warnings and the valuable opportunity to ask all those questions about what labels are required on an aerosol can and what information is needed to support them.

#### Who should attend?

Anyone responsible for classification and labelling of aerosols or for advising customers

**Price:** *Retailers rate* £275pp + VAT

## 13 September

### The Safe Handling of Aerosol Propellants

DH Industries, Laindon Essex

The thing that distinguishes aerosol filling from that of other packaged goods is the use of propellants. The aerosol industry has an excellent safety record and key to this has been the safe handling of these propellants. This course aims to provide delegates with a knowledge of the issues surrounding propellant handling and provide practical examples of how this applies to an aerosol filling line.

#### Who should attend?

The course is designed for operations and maintenance staff from aerosol filling plants, their line managers, or anyone who needs to have a practical knowledge of the safe handling of aerosol propellants in the plant.

**Price:** *Members rate* £80 pp + VAT

*Non Members rate:* £150 pp + VAT

## 11 & 12 October

### BAMA Autumn Forum, AGM & Awards Dinner

The two day Forum enables you to catch up with industry colleagues, get up to speed with the latest issues and learn about innovations all in one place, so represents excellent use of your time.

The fourth BAMA Awards dinner will take place on the Thursday evening. Non members may not attend the seminars. Members are however encouraged to bring as many guests as they wish to the dinner.

More details will be available shortly.

## 13 & 14 November

### Aerosol Technology

Stratford Hotel, Stratford Upon Avon

This intensive 2 day course is designed to provide a good understanding of how an aerosol works, how it is made, what affects the performance of an aerosol product as well as the environmental and regulatory considerations that need to be taken into account.

#### Who should attend?

The course is designed for anyone new to the industry or wishing to update their knowledge of the aerosol. It is targeted at supervisor level/laboratory staff and above. The course is also well suited to those experienced in one area of the industry but wishing to enhance their knowledge of other areas.
